Dear sirs,

My previous objections to granting permission for a waste processing plant at this site still stands, in fact with the imminent opening of the NDR and the additional traffic that is likely to generate more noise and pollution than we already have with the rat runs to the A47. This development is going to bring increased traffic noise day and night, vermin and pollution both air and water to the local area, which is becoming a popular recreational area with the Dinosaur Park the new Royal Norfolk golf courses, Blackwater Farm Acquisition centre, Fishing and the Marriots Way all bringing much needed income to the local community supporting shops pubs and restaurants, all this will be put in jeopardy if this isn't stopped once and for all. Worst of all peoples lives and health will adversely be affected, please do the right thing and REJECT this application permanently.

yours Faithfully

Nigel Cushion

Dear sirs,

It is with horror that that I hear the news that the former BPI Polythene site is being proposed as a new Waste Processing Plant. After all the years of living with Pimlots Farm, fighting the rendering plant, its unbelievable that its now suggested that this new processing plant is being considered to blight our lives once more. I am vehemently apposed to this or any similar development, either within or on the outskirts of the village, this would contribute nothing to the local economy, only further down grade our local environment through noise pollution, and additional traffic. With the go ahead of the NDVR, the A1067 between its end and the A47 is already going to turn into a rat run for all classes of vehicles, we need this additional traffic like a hole in the head.

I request your support in REFUSING this application to ensure despite central governments attempts to ride roughshod over small community's this is not allowed to succeed!

yours Faithfully
