Title: Figure 10 Augmented Zone of Theoretical Visibility (ZTV)

Document: Landscape and Visual Appraisal (LVA)

- Legend:
- Site Boundary
 - Study Areas
 - Viewpoint
 - Woodland
- Augmented Zone of Theoretical Visibility (ZTV)**
- Views of the proposed development theoretically visible

Notes

1) A composite of the Environment Agency's 2m DSM (2020) LIDAR (which includes screening features such as buildings) and the Forestry Commissions National Forestry Inventory (NFI) datasets were used to produce this Zone of Theoretical Visibility (ZTV). The resulting ZTV demonstrates where the development may be visible from, when considering the existing screening elements such as buildings from the DSM, as well as woodland (modelled at 14m high).

2) The ZTV was based upon the assumption of a flat elevation level for the entire study boundary, with the proposed development at 3m above ground, with an observer height of 1.7m
