Subject: New comments for application FUL/2023/0005

Categories: BSA

New comments have been received for application FUL/2023/0005 [REDACTED]

Comments:

I am in full support of this application and applaud NCC's forward thinking in improving our recycling services in a world where sustainability is becoming more and more important. The proposed site is sympathetic to the landscape and environment so there is no harm to the AONB, nor will it be an eyesore when viewed from the road. The pledge to improve the access from the A148 into the site will make the junction safer and the larger site footprint will prevent queuing on the highway and reduce the number of cars parked in the lay-by, improving road safety. I feel it more beneficial to move the site across the road rather than expand the existing site, to prevent the removal of trees that surround the current site and therefore allow for better visual shielding from the A148. This improvement to the local infrastructure can only be a good thing and could potentially result in future improvements, so I hope that this application is granted to secure a greener future for North Norfolk.
