New comments have been received for application FUL/2023/0005

**Comments:**

I fully support this planning application for the following reasons;

- The existing site is not sufficient for the size of Sheringham's residential population due to its expansion over the last 20 years, as well as surrounding towns and villages.
- It could increase the employment opportunities for local people.
- The new recycling centre could lead to future infrastructure improvements such as a roundabout at the top of Holway Road.
- It will allow local trades to dispose of waste rather than travel further afield reducing carbon emissions.
- Buses transporting customers to and from Hilltop Outdoor Centre will have easier access as the road and lay-by will be clear of parked and queuing cars which will benefit their business greatly. In addition, people using the new centre will not be impacted by traffic jams sometimes caused by coaches accessing Hilltop.
- A reuse shop will massively reduce the amount of waste and improve recycling rates to create a green, sustainable North Norfolk.
