Subject: New comments for application FUL/2023/0005

Categories: BSA

New comments have been received for application FUL/2023/0005 [REDACTED]

Comments:

I would like to support this application as Sheringham ,Holt and Cromer have grown as towns in size over the years. It is obvious that the existing site cannot deal with the capacity of waste from the the catchment areas that it services.

It is not a very practical site to operate or use, as it is small and access is tight for vehicles coming and going into the compound. It also has to be closed for a period whenever the containers need to be exchanged causing delays and confusion on the access road to the compound.

The new proposals would overcome the constraints of the existing site as far as capacity and ease of use are concerned, and traffic management to and from the site will have been well thought out .

At the end of the day we need a recycle centre and moving it from one side of the road to the other cannot make a big difference to the ANOB . The old site wont be required any more and the new site will be screened with trees and shrubs to minimize the visual impact.
