New comments have been received for application FUL/2023/0005

Comments:

I believe that this is an ideal site for such a facility, because

- Located close to a major A road, so no blocking up minor roads to such a facility
- Tucked away from view
- A real need for such a facility in this area, although I accept that this might not appeal to the closest residents. However, having lived close to such a facility being built very close to a house I used to have before, once built I found no noise or smells, which had been my concerns, and really felt how useful it was to have such a facility close by.
- Useful for residents of Cromer, Sheringham and Holt (and local villages) significantly reducing emissions in less travel to alternative sites.
- Better to use this land for practical purpose, rather than derelict, unused, scrubland as currently seems to be the case.
