New comments have been received for application FUL/2023/0005

Comments:

We are not happy with the proposed site for the new recycling centre. The A149 is already a difficult road to turn right into from Britons Lane and these plans will make it highly dangerous! There will be much more traffic using the centre and some of it will be heavy lorries. Ww already have big lorries using Britons Lane to access the quarry . Britons Lane is a narrow , bendy country road and it cannot take excess traffic from the site that decides to turn left and go down Britons Lane rather than try and turn right onto a very busy road! Look how dangerous the top of Holway Road is already!

Could it not be built at the east end of Cromer on 2 acres of land on an industrial estate ?This would be much less of an eye sore and would not affect the children using Hilltop. Please think very carefully before you make a decision which will have so many adverse effects on our village.
