WARNING: External email, think before you click!

Dear all,

Thank you for the consultation:-

I have the following comments following on from my original response dated 23 March 2023.

Lighting

Please can hours of use for lighting be confirmed – it is assumed that their operation is restricted operational hours only. It is noted that lighting is at distance from residential receptors, which is positive in terms of lighting impacts.

Noise Screening

-

The provision of further noise screening is welcomed in terms of an “ Additional living acoustic fencing has been added along the western boundary as a courtesy in response to concerns raised by Hilltops Activity Centre.” Please can details of the details of location, design and height be requested for confirmation.

Operational noise – Impact noise

Maximum noise levels - I would request further detail on the noise levels at the 4 receptors (in figure 14) on the expected maximum noise levels, for example from site activities such as impact noise, as I have still have no found calculations to illustrate this aspect at the following locations.

R1 being outdoor woodland use by the outdoor activity centre.

R2 at the activity centre accommodation.

R3 and R4 are residential properties.

Construction site hours

I have noted the proposed construction site working hours in the Environmental Noise Impact Assessment on page 13 section 4.2.2 which are beyond the standard working day expected. I would recommend that the construction working hours are limited to 08.00 hours to 18.00 hours on Monday to Friday and 08.00 hours to 13.00 hours on Saturday. Activity and access on the site for quiet works/site access from 07.00 hours may be possible and this can be discussed further.

Please contact me if there are any queries on the above.

Thanks and regards

Carol Bye
