Subject: New comments for application FUL/2023/0019

Categories: BSA

New comments have been received for application FUL/2023/0019 [REDACTED]

Comments:

The proposal follows numerous others that have already been rejected from this company. The fact that the lorries have continued using the route through Spooner Row despite this undermines the credibility of the process. There is a single road providing access through Spooner Row which has a train crossing and primary school in close proximity. It is unsuitable as a main route for these lorries which create congestion, endanger pedestrians, cyclists and motorists, pollute the environment, increase noise and damage the pavements. The frequency of lorries using this route is very high and is undermining the rural nature of the village. Applications have already been rejected and this one should also be, with it also important to enforce the decision.
